

Hour of Code

What is it?

The Hour of Code invites students in Grade 2+ to spend an hour coding familiar characters in various environments. Used by millions of people, code.org/learn allows kids to choose from Minecraft, Moana, Star Wars and many other themes to control objects and achieve objectives. It works best in a web browser on a computer but many work on tablets too.

Hardware Requirements

No specialised hardware is needed as the Hour of Code website works on modern computers. Some games also work on iPads & Android devices.

Resources

- Visit code.org/learn on a computer to get started
- Each coding game details the ideal age group and skill level
- The most popular coding games are Minecraft, Moana, Star Wars & Flappy Bird. Each of which work on PCs, iPads & Android devices.
- Lesson Guides are available at code.org/educate/teacher-led

The Hour of Code is run by code.org, a non-profit dedicated to expanding access to computer science
