

Swift Playgrounds

What is it?

Swift is an open-source programming language created by Apple specifically for developing iPhone & iPad apps. The language's following is growing rapidly and it's now being used for much more than iOS development.

Swift Playgrounds is an iPad app created by Apple to introduce and young adults to the world of coding. Students produce real, usable code in an engaging environment and develop skills that are directly transferable if they'd like to build an iOS app in the future.

Resources & Requirements

The Swift Playgrounds app is a free download from the Apple App Store, it is compatible exclusively with newer iPads.

To get started visit:
apple.com/au/swift/playgrounds

Or search the App Store for 'Swift Playgrounds'

Even if students don't plan on building iOS apps, Swift Playgrounds still provides a valuable introduction to coding
